SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications with the MERN stack, Next.js, and TypeScript. Experienced in taking products from concept to production, with a focus on clean architecture, performance, and intuitive user experiences.

TECHNICAL SKILLS

Frontend React, Next.js, TypeScript, Tailwind CSS, Three.js, GSAP
Backend & Tools Node.js, Express.js, MongoDB, Git, Supabase, AWS

EXPERIENCE

- **Freelance Full Stack Developer** July 2024 – Present
Self-Employed Remote
 - Built web applications in Next.js, TypeScript, and Tailwind CSS, from architecture through deployment.
 - Delivered startup MVPs and admin panels on a reusable component architecture that shortened later builds.
 - Built interactive interfaces with GSAP and Framer Motion, tuned for low-end mobile devices.
- **Full Stack Developer** 2023 May – 2024 June
Torc Infotech Kochi, Kerala
 - Built and maintained production MERN applications, from database design to responsive frontends.
 - Developed admin dashboards with CRUD, candidate management, and document workflows used daily.
 - Mentored interns through code review and pairing until they contributed independently.

PROJECTS

- **WatchTower – Deception Intelligence Platform** watchtower-hackathon.vercel.app

Security platform built for organizations: plants AI-generated honeytokens across an organization and correlates any interaction into incidents mapped to MITRE ATT&CK.

- **IEDC Hub – Club Management Portal** ietiedc.vercel.app

Portal in active use by my college's IEDC club: event scheduling and registration, role-based accounts for leads and members, and automated certificate generation.

[Next.js](#) · [Full-stack](#) · [Role-based access](#)
- **Classmate – Smart Attendance Manager** iet-absentees.vercel.app

Attendance system built to fill a gap at my college, now used day to day by teachers: separate teacher and student modes, per-subject trend analytics, and CSV import for class onboarding.
